DETAILED ACTION

1. Applicant response of 4/9/02 has been considered with the following results.

Specification

2. The amendment to the title of the invention contains new matter.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-31 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. As originally presented and claimed, the invention recited, "reserving" the frames containing the identification information. Now, as amended, the claims recite --- preserving ----, and as such are drawn to subject matter not previously recited in the disclosure as originally filed. Reserving is not the same as preserving.

This is a NEW MATTER REJECTION. Cancellation of such subject matter is required.

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 4,6,8,12,16,20,23,26 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention, and or failing to particularly point out and distinctly claim the invention.

- a) With respect to claims 1 and 6 although these claims now require/recite the step of --- preserving ---, such does not occur unless there is recognition of the identification information. Although such is implied, it is not positively recited. This omission is further compounded when → claim 4 BROADENS its independent claim by requiring the deletion of such a preserving step. This deletion does not further limit the independent claim, but broadens it. Also, before such deletion can occur in claim 4, information indicative of "incapable of identifying the CD-RW disc" must be recognized. Similar problems exists in claims 8, 12, 17 20, 26 with respect to their parent claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1, 2, 6, 10, 28 and 30 are rejected under 35 U.S.C. 103(a) as obvious over Tani further considered with Green, Jr. et al and all further considered with Ikeda et al.

Tani discloses an optical recording system, especially for a rewritable disk. Tani further discloses a PMA, LI and LO and program area. The system provides for the erasure of the information. Although Tani discloses erasing data, there is no preserving of identification data in the PMA of the record.

Green Jr. et al discloses in this environment the ability of having particular identification information contained in the PMA and if & when the disc is a rewritable one, skipping the erasure thereof see figure. 4 and its associated disclosure.

✓ Although erasure is disclosed in Tani, applicants' claim "logical erasure". Logical erasure in this environment if further taught by Ikeda et al.

It would have been obvious to modify the reference of Tani with the additional teachings from Green, Jr. et al and Ikeda et al and provide for a logical erasure procedure of the data on a rewritable disc preserving disc id, motivation is to provide for a logical erasure procedure, in lieu of erasing the entire disc and for saving disc id information which remains with the media for its life as taught by Green Jr. et al.

Conclusion

Allowable Subject Matter

Claims 14-27,29, and 31 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112; first and second paragraph, set forth in this Office action.

Claims 3,5,7,11 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims as well as correct for the problems under 112 paragraphs 1 & 2 of their respective parent claim.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
